

CLIENT: Merseyside FRS

PROJECT: Asset Surveys & Maintenance Planning

ROLE: Asset Surveyor

REAMS were instructed by Merseyside Fire & Rescue Service to carry out asset surveys across their estate. This included all fire stations, office headquarters and support locations.

The project involved the surveying and assessment of 29 properties, the provision of detailed engineering asset schedules, the condition assessment of identified assets & engineering systems and the provision of planned preventative maintenance schedules.

REAMS assisted MFRS in the defining of the asset and maintenance strategy and the implementation of a PPM regime, with the aim of reducing plant failure, maintenance costs and protection of key systems and services.

"An Excellent Authority"

KEY DUTIES

- ▶ Review of Specifications & Design
- ▶ Ongoing monthly site visits
- ▶ Monthly reporting and attendance at meetings
- ▶ Attendance at testing & commissioning
